CDR 0.18 · Normal

HYPERTENSIVE RETINOPATHY

NO HR DETECTED · Probability 0%

GRAD-CAM ATTENTION HEATMAP

Red/orange regions indicate areas where the AI detected signs of diabetic retinopathy.

The heatmap is generated using Gradient-weighted Class Activation Mapping (Grad-CAM).

CLINICAL RECOMMENDATION

URGENT REFERRAL

Refer to ophthalmologist within 2 to 4 weeks

Significant findings detected requiring prompt specialist evaluation. Ensure referral is acknowledged and follow up if no response within 5 business days.
